Profile

I guide healthcare partners through integration assurance, from assessing their proposed use case to testing, deployment and aftercare. My experience combines technical investigation with partner coordination, alongside leading improvements to onboarding systems, team documentation and assurance processes.

Core Skills

Assurance leadership: Onboarding, use-case assessment, specialist reviews, witness testing, deployment and aftercare.
Technical assurance: API requirements, interface selection, integration troubleshooting, SQL Server and AWS IP whitelisting.
Stakeholder management: Partner guidance, NHS IM1 liaison, supplier forums and cross-team issue resolution.
Governance and knowledge: SCAL review, ServiceNow, Confluence, auditable records and technical documentation.
Risk and improvement: Middleware risks, audit follow-up projects, regression testing and process improvement.

Work Experience

Continuous employment since May 2021 across EMIS Health, OptumUK and Enlivio Health.

Senior Assurance Executive

Enlivio Health: Aug. 2026 — Present
OptumUK: Mar. 2025 — Aug. 2026
EMIS Health: Apr. 2023 — Mar. 2025
UK, Remote

- Led the development and implementation of the ServiceNow assurance onboarding portal, including user-scenario and regression testing. The portal became a shared reference tool, supporting a more joined-up view of each partner and their assurance activity.
- Established the team's Assurance Confluence space, documenting previously undocumented processes and filling gaps in existing guidance to create a shared reference for colleagues.
- Identified and escalated gaps in middleware assurance, leading to the introduction of a new process to address the risks.
- Took ownership of multiple improvement projects arising from audit findings, translating identified issues into follow-up actions and process changes.
- Lead third-party assurance across NHS and commercial partner workstreams, coordinating onboarding, specialist reviews, testing, deployment and aftercare.
- Work with partners, NHS colleagues and internal specialists to resolve queries and progress assurance. Supported the IM1 Supplier Forum during a management transition, helping address supplier queries and progress assurance activity.
- Apply working knowledge of EMIS Web, Partner API, Transaction IM, PFS and Extracts to assess use cases and advise on suitable interfaces.
- Prepare test environments and conduct witness testing using virtual machines, SQL Server and AWS IP whitelisting; review NHS assurance documentation and maintain accurate records.
- Assess proposed API usage and call volumes, engaging database specialists to review potential system impact.

Assurance Executive

EMIS Health
May 2021 — Mar. 2023 > UK, Remote

- Delivered partner assurance within one workstream before promotion in April 2023 and subsequent expansion to both workstreams.

HR Transformation Consultant

Siemens
Oct. 2018 — Feb. 2021 > Portugal, Lisbon, Hybrid

- Prepared and validated HR data, ran mass uploads and investigated failures with technical teams.
- Created procedure manuals and performed acceptance testing during an HR system overhaul spanning five countries.
- Received the Siemens Eureka Award for the highest number of suggested and successfully implemented service improvement ideas.
- Proposed and helped establish the Internal Coding Academy, matching colleagues seeking to upskill with volunteer mentors.

HR Specialist
Siemens
May 2017 — Sep. 2018 > Portugal, Lisbon

- Managed employee and organisational data in SAP and supported the shared services annual audit as a Control Requirement Contact, reviewing evidence with five country-specific teams.

HR Global Mobility Consultant
Siemens
Feb. 2014 — May 2017 > Portugal, Lisbon

- Created procedure guides, operating manuals and training materials, and delivered knowledge transfer for a new business travel centre in Prague.
- Advised employees on international business travel, prepared monthly reports and supported relocation, process improvement and colleague training.
